PROJECT BRIEF: EXAMOCK — ONLINE COMPETITIVE EXAM PREPARATION PLATFORM

www.examock.in

15 July, 2025

📌 Objective

Develop a web-based application where students can:

- Watch curated YouTube videos based on their chosen entrance exam syllabus.
- Attempt mock tests (topic-wise & full syllabus) designed by Examock team.
- Track their progress, plan study time, benchmark their scores against peers.
- Get AI-powered assistance for doubt solving and personalized suggestions.

Key Features

👤 User Journey:

- User visits the site and clicks Login with Google (Gmail).
- On first login:
 - User chooses one exam type (e.g., CAT, NEET, GRE, etc.).
 - → This choice locks in for that user account.
 - User enters their mobile number, and an OTP is sent for verification.
 - Once verified, user is auto-subscribed (via single click) to all the YouTube channels from where videos are sourced for their exam type (if technically feasible).
- User is then redirected to their personal dashboard.

Dashboard Features

✅ Exam-Specific Dashboard:

- Displays only the content relevant to their selected exam type.
- Clean, distraction-free interface.

✅ Study Materials:

- Topic-wise video playlist embedded from YouTube.
- Playlists & videos are mapped to the syllabus topics of the chosen exam.

✅ Mock Tests:

- Chapter-wise MCQ tests: completely free.
- Full syllabus mock tests:
 - First 3 full-length tests are free.
 - Remaining ~22 tests are paid.
 - Payment integration (preferably Razorpay) for purchasing access to paid tests.
- Mock test engine:
 - Timer, question navigation, marking scheme.
 - Instant result with correct/wrong answers, and explanations if available.

✅ Progress Tracking & Suggestions:

- Chapter-wise completion and scores.
- AI-powered suggestions on which topics to focus on, based on weak areas & progress data.

PROJECT BRIEF: EXAMOCK — ONLINE COMPETITIVE EXAM PREPARATION PLATFORM

www.examock.in

15 July, 2025

✓ Peer Comparison:

- See percentile or comparison chart against other students of same exam type.

✓ Study Planner:

- Suggests how to distribute study time depending on:
 - Exam date entered by student.
 - Topics already completed.
 - Mock test scores.

✓ AI-Based Doubt Solving:

- Students can type their doubts/questions.
- AI responds with easy-to-understand explanations and solutions.
- Optional: allow image upload of question for OCR + AI solution (future enhancement).

User Account Management

- Login is only through Gmail (OAuth).
- Each Gmail login is mapped to one mobile number and one exam type.
- User cannot switch exam types once chosen (unless admin resets manually).
- User can log out and log back in anytime.

Admin Panel

For internal use by Examock team:

- Upload and manage YouTube video links, categorized by:
 - Exam Type
 - Subject
 - Topic
- Create & manage mock tests (questions, answers, keys, explanations).
- Set free/paid status of full-length tests.
- View users, their progress, scores, and analytics.
- See paid test purchase records.
- Broadcast updates/notifications to users of a specific exam type.

Technical Considerations

Frontend:

- Responsive design: desktop, tablet, and mobile friendly.
- Minimal, exam-focused UI.

Backend:

- User management (Gmail OAuth & Mobile OTP verification).
- Database to store:
 - Users, exams, topics, video URLs, mock tests, scores, progress.

Razorpay integration for payments (paid full-length tests).

- AI integration for:
 - Progress-based suggestions.
 - Doubt-solving chatbot.

OTP Verification:

- Use SMS gateway (e.g., Twilio, MSG91) to send & verify OTP at first login.

YouTube Channel Subscription:

- If technically possible (via YouTube API & user permissions), one-click subscribe the user to pre-defined channels at first login. **OR** On the first login, show a page that lists all the recommended YouTube channels (with logos and names) and embed a YouTube Subscribe Button for each.

User Data

For each user, store:

- Gmail ID
- Mobile number
- Exam type
- Date of registration
- Topic-wise progress
- Mock test scores
- Paid test purchase status
- Exam date (optional)

Future Enhancements

- Allow users to upgrade to premium plans (more AI features, advanced analytics).
- Mobile app version.
- Peer discussion forums.
- Image-based doubt solving.

 Deliverables

- ✓ Fully functional web application (frontend + backend + database).
- ✓ Admin panel.
- ✓ Payment gateway integration.
- ✓ AI integration (progress suggestions & doubt solving).
- ✓ User documentation.
- ✓ Developer documentation (API endpoints, DB schema, AI endpoints).

 Suggested Tech Stack

- Frontend: React / Angular / Vue
- Backend: Node.js / Django / Laravel
